Our challenge

Create a website with Symfony 3.2+ using a japanese style design.

Our concept

Create a social website around Japanese gastronomy.

Our concept

Moodboard

The screenshot shows the homepage of Bob & Angie. At the top, there's a banner for recipe development and rental. Below it, a navigation bar includes links for Home, New Recipes, Meal Planning, Recipe Search by Ingredient, Recipe Collection, and Recipe Rental. A large image of a meal featuring a meat patty and mashed potatoes is displayed. To the left, a green circular graphic with the character '旬' (Keshi) is shown, along with text for '旬野菜のヘルシー食べ合わせレシピ'. Below this, there's a section for 'ピックアップレシピ' (Picks) with four small images and their names: 'かぶの煮みそ粥' (202 Kcal), '半熟卵とベビーリーフのサラダ' (336 Kcal), 'トマトと巻きとくらげの中華炒め' (286 Kcal), and 'バナナとアボカドのパンケーキ風' (417 Kcal). On the right, a 'Today's Meal' section for February 24th shows a bowl of rice with salmon and a side dish, labeled 'まぐろとたたき長いも丼 (他2品)' with a total of 653 Kcal for 3 people. A nutritional chart at the bottom indicates values for protein, carbohydrates, fat, fiber, and iron.

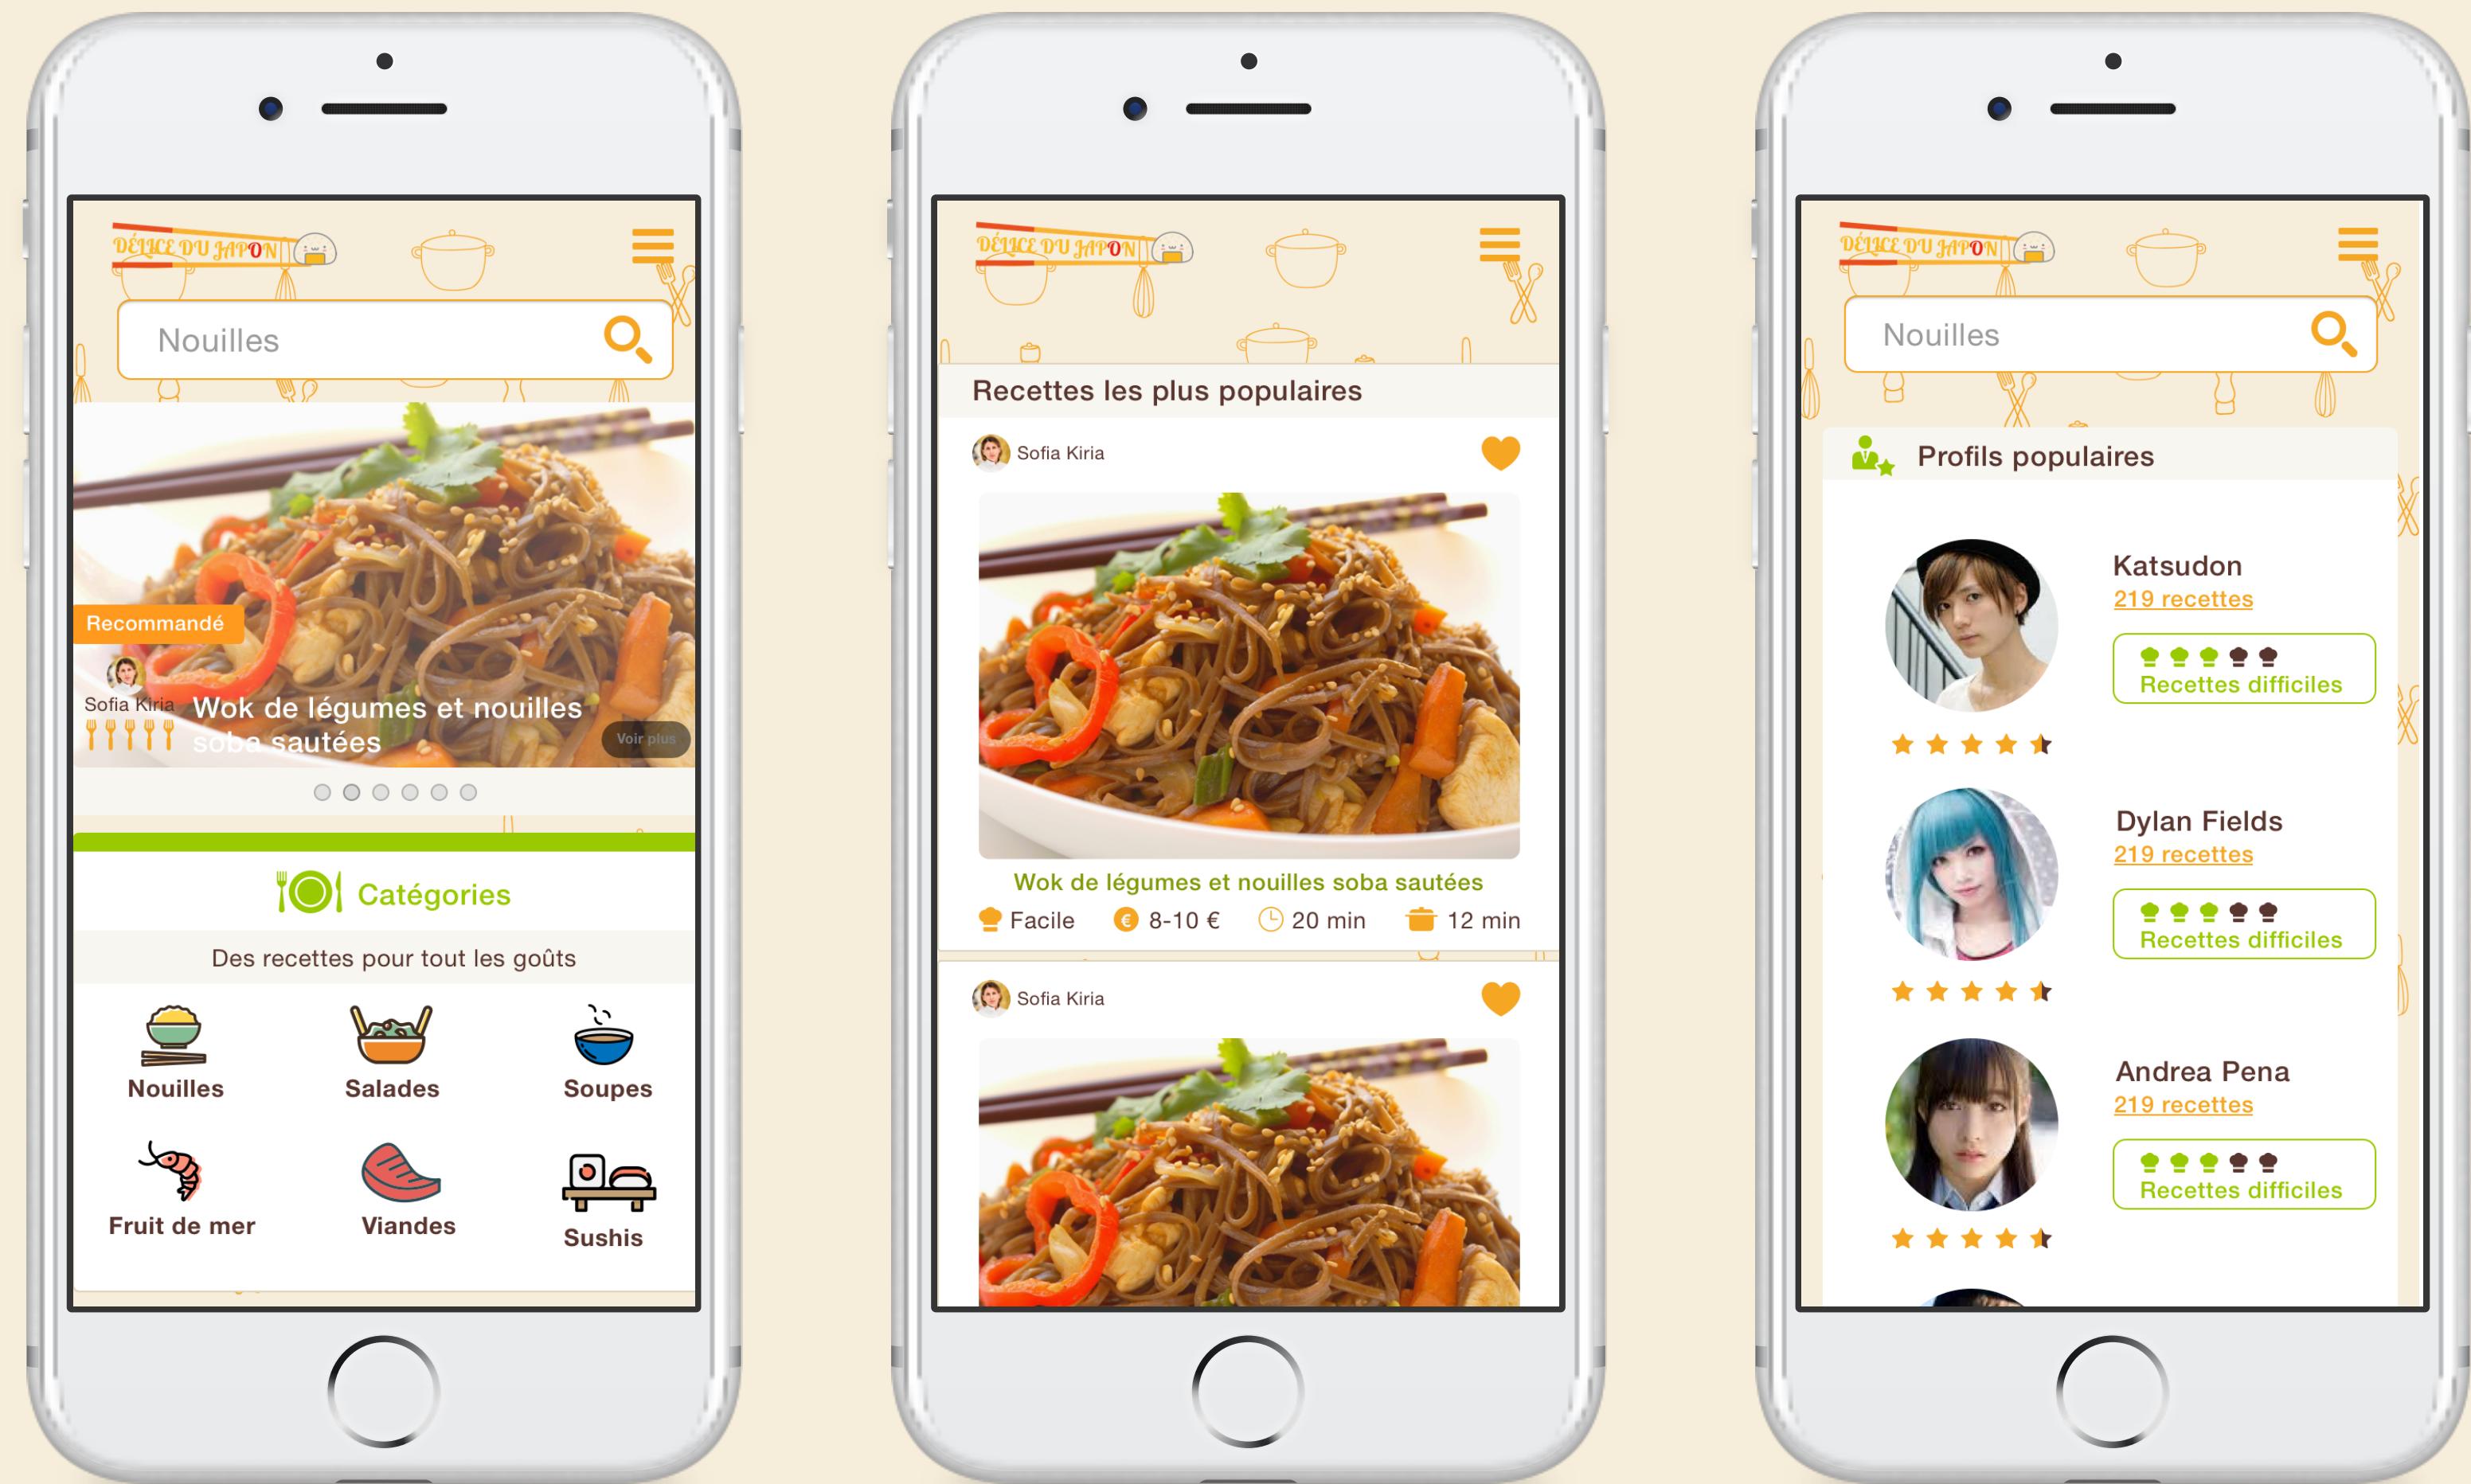

The screenshot shows the homepage of TOKYO CENTRAL. At the top, there are links for Home, Rewards Program, Locations, Weekly Ads, Shops & Restaurants, and Contact Us. A search bar and a language selection for English are also present. A prominent banner for 'TABLE FOR TWO x TOKYO CENTRAL CHANGE THE WORLD WITH ONIGIRI (RICE BALL)' features a red circle with a white rice ball icon and text encouraging people to order for one to feed two. Below this, a large advertisement for a 'Matcha Made Easy' machine by Tea-Cat shows the product and a price of \$199.99. The machine is described as making authentic matcha in four steps: grinding loose tea leaves, brewing with hot or warm water, whisking the powder with hot water, and serving it. A 'FREE SHIPPING' offer is mentioned for orders over \$120. Other products shown include a rice cooker, mochi-sweet rice, cream stew, and Japanese curry.
